Key Achievements

Revenue Growth via Data Integrity

Identified and analyzed inconsistencies in web traffic routing from key customer. Rebuilt data flow and tracking logic, resulting in 85% increase in client revenue.

Linguistic Analysis Tool

Built validation system to cross-reference millions of domain against brand keywords, accounting for human typing behavior (e.g., keyboard proximity errors) to identify undervalued domains. This automated solution reduced analysis time from days to hours and directly drove a inventory monetization increase by ~20%.

Revenue Optimization

Diagnosed and corrected misconfigured client integration using third-party server verification, cutting reported discrepancies by 40pp driving a 25% revenue uplift over subsequent quarters.

Scaling up via Process Innovation

Built a brand intelligence pipeline 3-step web crawler (Playwright + AWS Athena/Common Crawl + Wayback Machine) with LLM based keyword enrichment, that generates brand-related keywords at scale — expanding advertiser bidding inventory and replacing manual research that previously capped throughput at ~10 brands. Now runs across thousands.

Volunteer Leadership

Head Event Coordinator for "Kraków Mountain Festival", managing event operations, volunteer workflow, and equipment delivery coordination.
