

Maciej Kwarcianny

Senior Data & Growth Analyst/ Web Traffic SME

Business-savvy, data-driven analyst with 6+ years of experience. Combining strategic thinking with strong technical expertise, with a proven track record of translating complex data and user behavior into measurable revenue growth. Building production-grade, self-serve analytics solutions end-to-end.

Personal Summary

Data-driven business professional, blend of strategic thinker and technical expert. Skilled at turning raw data into a reliable source of truth for revenue and growth decisions. Fluent in SQL and data analytics yet comfortable with leading high-impact discussions with senior stakeholders and enterprise-scale clients.

Bringing a holistic approach to problem solving. Acting as a trusted analytical partner to product, marketing and engineering teams — proactively surfacing insights and opportunities, and shipping the self-serve tools that make them measurable.

\$ Business Expertise

Understanding of market dynamics, monetization models, and corporate strategy. Proven ability to identify growth opportunities in data and turn them into initiatives with measurable revenue impact.

<> Technical Expertise

Hands-on experience with data pipelines, cloud warehouses and event-level web traffic enables me to design measurement systems, ensure data integrity across tools, and validate the impact of initiatives end-to-end.

Professional Experience

Commerce Media Tech (Zeropark)

Senior Business Analyst

12.2025 - Present

- Architected a production-grade Claude LLM assisted self-serve analytics platform on AWS serverless (Lambda, MCP, DuckDB) — enabling non-technical stakeholders run complex analysis using natural language, cutting time-to-insight from days to minutes.
- Democratised data access across the organisation with a company-wide BI pipeline platform (Lambda, EventBridge, DuckDB) that replaced manual, multi-step report assembly with fully automated — covering every data source (Redshift, PostgreSQL, external APIs, SharePoint); new reports ship in hours not days. User no longer need to know Python or AWS infrastructure, just SQL.
- Scaled an LLM-powered brand-intelligence engine that turns mistyped-domain traffic into ready-to-launch advertiser offers — expanding coverage from ~10 manually researched brands to thousands (14.8M inventory domains scanned in minutes)
- Spearheaded critical infrastructure changes for Key client (40% company revenue) resulting in a sustainable 85% YoY revenue uplift.
- Technical Lead of Asana, Jira, Slack ecosystems migration. Migration ran fully in-house provided \$25k+ operational savings.

Commerce Media Tech (Zeropark)

Business Analyst/ Key Account Manager

05.2025 - 11.2025

- Diagnosed and corrected misconfigured client integration, reducing data discrepancy by 20pp subsequently driving a 25% revenue uplift over next quarters.
- Engineered data-driven pricing and margin optimization that boosted profitability by 12% while maintaining competitive positioning.
- Architected self-serve, real-time KPI dashboards using SQL and Python, enabling stakeholders to answer key questions without analyst involvement.

Commerce Media Tech (Zeropark)

Technical Key Account Manager

06.2023 - 04.2025

- Planned and implemented a proprietary Python matching engine to detect brand-related domain typos, increasing inventory monetization by 20%.
- Analyzed user acquisition funnels and traffic quality across sources, surfacing insights that shaped client bidding and budget strategy.
- Acted as the primary technical liaison between C-suite stakeholders and engineering teams to roadmap high-priority product features.
- Built custom analytics dashboards to track KPIs, enabling clients to scale budgets with real-time decision-making insights.

Codewise Sp. z o.o.

Account Manager / Senior Account Manager

06.2020 - 05.2023

- Acted as a bridge between clients and engineering teams, translating business needs into tech requirements.
- Collaborated with Product teams to roadmap client-requested features.

Codewise Sp. z o.o.

Content Quality Specialist

05.2019 - 04.2020

- Conducted in-depth audits of ad traffic quality across publisher networks, implementing fraud detection measures.
- Developed internal guidelines for traffic filtering and content approval later adopted as a company-wide standard.

Key Achievements

Self-Serve Analytics Platform

Built a conversational reporting platform (Claude + MCP) on fully serverless AWS — OAuth-secured, with read-only SQL over an S3 data lake and one-click CSV exports. Established a source of truth stakeholders query themselves, cutting time-to-insight from days to minutes.

Revenue Growth via Data Integrity

Identified and analyzed inconsistencies in web traffic routing from key customer. Rebuilt data flow and tracking logic, resulting in 85% increase in client revenue.

Revenue Optimization via Client Integration Fixes

Diagnosed and corrected misconfigured client integration using third-party server verification, cutting reported discrepancies by 40pp driving a 25% revenue uplift.

Brand Intelligence Engine

Built a brand intelligence pipeline: 3-step web crawler (Playwright + AWS Athena/Common Crawl + Wayback Machine) with LLM-based keyword enrichment, gated by human-labeled precision evalslution. Replaced manual research capped at ~100 brands that now runs across thousands with minimal human oversight.

Zero-Maintenance BI Pipelines

Replaced per-report scripts with one shared pipeline engine where each report is a single YAML config. New reports ship in hours not days. Lowered technical overhead to prepare new reports to minimal levels AWS infra & python are no longer required Simple SQL is sufficient.

Volunteer Leadership

Head Event Coordinator for "Kraków Mountain Festival", managing event operations, volunteer workflow, and equipment delivery coordination.

Skills

Data Stack

Cloud data warehouses & lakes (Redshift, Athena, S3)

AWS Serverless (Lambda, API Gateway, EventBridge)

Infrastructure as Code (AWS SAM, CloudFormation)

API Integrations (REST APIs & Webhooks)

Web Scraping (Playwright, BeautifulSoup, Common Crawl)

AI-augmented analytics & LLM-powered enrichment pipelines

LLM agent design (Anthropic Claude SDK)

Automated testing & data quality gates (pytest)

Analytics

SQL (PostgreSQL, Redshift, AWS Athena, DuckDB)

BI & dashboards (Power BI, Google Analytics)

Self-serve reporting & source-of-truth metric design

Python (Pandas, NumPy)

Funnel, cohort & retention analytics (churn modeling)

Web Traffic Analysis (source validation, fraud detection)

Marketing & attribution analytics (ad-tech: RTB, traffic quality)

Advanced Excel (Power Query, pivot tables, nested formulas)

Business

Monetization & pricing optimization

Revenue optimization & data-driven decision making

Technical ↔ Business Translation

Strategic thought partnership with Product & Marketing

Enterprise account ownership

Cross-functional tooling (Jira, Asana, Confluence, Slack)

Workflow & Process Automation

Education

MA, Marketing and Market Communication; Product Management
Cracow University of Economics

2014 - 2016

BA, English Philology; English in Business Administration
Andrzej Frycz Modrzewski Krakow University

2011 - 2014

Certificates

Python for Data Science, AI & Development · IBM | OCT 2025

Data Analysis with Python · IBM | SEP 2025

Databases and SQL for Data Science · IBM | AUG 2025

Generative AI Agents with Vertex AI · GOOGLE CLOUD | FEB 2025

ChatGPT & Zapier: Agentic AI · VANDERBILT UNIVERSITY | FEB 2025

Open Source Intelligence (OSINT) · NIEBEZPIECZNIK.PL | JUN 2021

Personal Interests

Scuba-Diving
